

HYDRAULIC VERTICAL LIFT

Pflow's Series 21 Lift Provides Efficient, Safe Vertical Handling for Loads Up To 6000 Lbs.

- Adaptable for mezzanines, through-floor, inside or outside applications. Customized to meet your exact needs.
- Quality construction with 6" wide flange columns, oversized bearings and heavy roller chain ensures strength, durability and long lasting performance.
- Carriage is lifted and lowered by two hydraulic cylinders mounted on the guide columns.
- Lifts loads up to 6,000 lbs. Carriage sizes to 10' x 10'. Vertical rise heights to 22'. Available in straddle or cantilever styles.
- Torsion bar links the two hydraulic cylinders to equalize the load and ensure the carriage remains level at all times.
- Available with patented DeckLock system which automatically locks carriage at critical upper levels and eliminates carriage bounce.
- Built-in, advanced safety features protect workers and materials. Access gates at each level are interlocked with lift operation.
- Velocity fuses prevent uncontrolled carriage descent in the unlikely event of a total hydraulic hose rupture.
- Meets ANSI/ASME B20.1 code.
