

## Series D

### HYDRAULIC VERTICAL LIFT

#### Pflow's Series D Lift Offers High Quality and Safety, Low Maintenance, Features Exclusive Dual-Pak Design

- Guided Dual-Pak design has no cables, chains, bearings or other components that can break or require lubrication.
- Carriage is lifted and lowered by dual 2" ram direct acting hydraulic cylinders.
- Lifts loads up to 3,000 lbs. Carriage sizes to 6' x 6'. Vertical rise heights to 14'. Ideal for mezzanine and balcony applications.
- Pressure-compensated control valve regulates flow of hydraulic oil to assure smooth, constant lowering speed under any load.
- Roll-formed columns provide precise carriage guidance, minimize rocking and assure smooth ascent/descent.
- Ultra high molecular weight polyethylene cylinder guide prevents cylinders from twisting during operation, improves cylinder life.
- Pressure switch prevents the carriage from drifting or sinking to ensure smoother, safer loading and unloading operations.
- Remote mounted control panel and TEFC motor are prewired, ready for immediate installation.
- Durable, high-quality construction ensures safe, reliable, long-term performance.
- Guaranteed code approval on every installation.
