Pflow's Series M Lift Offers High Performance And Durability With A Proven 2-Post Mechanical Design

- Designed to transport large, heavy loads between two or more levels. Ideal for high-cycle, automated systems or frequent use applications.
- Lifts up to 6,000 lb. loads with carriage sizes up to 10' x 12'. Unlimited vertical rise. Travel speeds up to 400 fpm.
- Carriage is lifted and lowered by heavy-duty roller chain attached to a mechanical lifting mechanism.
- Engineered to meet your exact application and height requirements.
- Heavy-duty construction provides superior strength, reliability and long-term performance.
- Offered with straddle or cantilever carriages.
- Built-in, advanced safety features protect workers and materials. Access gates at each level are interlocked with lift operation.
- Available with patented DeckLock system which automatically locks carriage at critical upper levels and eliminates carriage bounce or drift.
- Guaranteed code approval on every installation.
